WIPRO · INDUSTRY CLOUD & DIGITAL SALES DIRECTOR

Arpan Bakshi

Eight slides on how I read the role, what I bring to it and how I would run the first year.

Meeting with
Vikas Srivastava, Wipro

Date
27 October 2026

Based in
London, US citizen

HOW I READ IT

The Role

A practitioner seller who owns Industry Cloud & Digital deals inside accounts that client partners and global account executives already hold.

WHAT I WOULD SELL

Modernization, cloud and AI

Application modernization and cloud migration across AWS, Azure, Google Cloud and private cloud. API and integration, quality engineering and managed services sold on total cost of ownership. AI use cases built into each of these.

HOW I WOULD WORK

Technical deal owner in a matrix

I would take an opportunity from the first lead to signature alongside the account owner. Pre-sales, delivery, finance, legal and the hyperscaler alliances would build the proposal with me, and integrated deals would bring in other service lines.

HOW I WOULD BE MEASURED

Bookings, revenue and forecast

New bookings in TCV and ACV for the portfolio, bookings that turn into profitable revenue, and a monthly forecast that lands within 5% of actuals.

I built this from Wipro's related Industry Cloud & Digital practitioner postings, because I have not yet seen the full description for this title. Please correct anything I have wrong.

SIXTEEN YEARS SELLING CONSULTING TO EXECUTIVES

Track Record

16
years selling consulting to executives

£10m+
a year in fees won as Associate Partner

250
senior professionals trained on AI tools

4
regions of project work, and a US citizen

A new service line inside a matrix

Foster + Partners, 2020 to 2026

WHAT I DID

I co-created an advisory service line covering digital transformation and spatial consulting, and sold it into clients the design studios owned. Every opportunity began by giving a studio partner a reason to bring me in.

AT WIPRO

This is how a practitioner works with client partners. They own the account, I carry the number, and I earn access by growing their business.

Land and expand in life sciences

Foster + Partners

WHAT I DID

I pitched, negotiated and won a multi-year contract with a global pharmaceutical company, starting from an assessment of the client's own data across its whole portfolio.

AT WIPRO

A paid assessment that opens a multi-year programme is the same path from a modernization diagnostic to migration and managed run.

The specialist in the room

Foster + Partners and SOM New York

WHAT I DID

I presented to Fortune 500 chief executives and Wall Street bank executives, helping win contracts worth more than £10m and more than $3m a year in fees at SOM.

AT WIPRO

I can make the technical and commercial case to a CIO or CDO while the client partner holds the relationship.

REQUIREMENTS AND EVIDENCE

Fit

Five requirements are strong. Three are partial, and each one has a plan for the first ninety days.

REQUIREMENT	RATING	EVIDENCE OR PLAN
Consultative selling to executives	Strong	Sixteen years of pitches, bids and executive presentations in London and New York.
Selling inside a matrix	Strong	I sold an advisory line into accounts owned by design studio partners, with no accounts of my own.
AI use cases and points of view	Strong	I co-founded Atlas Learn, which trains boards and senior teams on Claude Code, Copilot Studio and Gemini.
Technical fluency	Strong	I write Python and C#, and built simulation tools and digital models used across a 2,500-person firm.
Clients in Wipro's sectors	Strong	Roche, Genentech, Apple, Oracle, Hyundai, JPMorgan Chase and Citigroup.
Cloud and modernization selling	Partial	I have sold digital transformation and not hyperscaler migration. I would pair with an ICD architect on early pursuits and complete AWS, Azure and Google Cloud sales accreditations by day 90.
A single deal of $20m or more	Partial	My largest wins were multi-year contracts. The sample deal on slide 6 shows how I would build a $20m pursuit with the deal desk.
A $15m to $20m portfolio	Partial	I have carried fee targets of more than £10m a year across several clients and studios.

MARKET CONTEXT

Why Now

The Americas need new bookings, and clients are paying for AI out of the savings that modernization produces.

AMERICAS

60%

of Wipro's revenue

Americas 1 fell 2.7% and Americas 2 fell 4.7% year on year in constant currency in Q2 FY27. The growth has to come from here.

LARGE DEALS

−59%

large-deal TCV, quarter on quarter

Large-deal bookings dropped 58.6% in Q2 FY27. Proactive pursuits shaped before an RFP rebuild that pipeline faster than waiting for tenders.

FUNDING

AI

funded from cost take-out

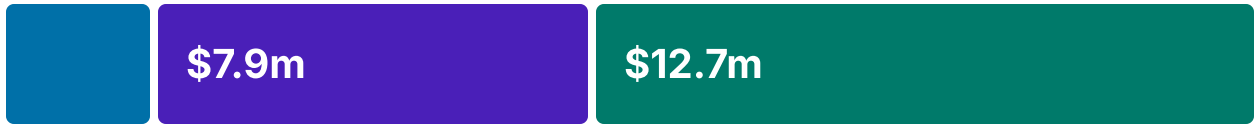

Management says clients reinvest savings in AI. A modernization case that pays for its own AI phase is easier to approve than new discretionary spend.

Sources: Wipro Q2 FY27 results and datasheet, 15 October 2026. Wipro and Google Cloud expanded partnership, 27 August 2026, with 10,000 AI-certified specialists and 200 agents on Marketplace.

FROM A DATED TRIGGER TO A $21M PURSUIT

Sample Deal

DePuy Synthes must leave Johnson & Johnson's shared IT before its transition agreements end, which means a whole cloud estate of its own.

$0.7m Diagnostic | Migration and modernization | Managed run

$21.3m TCV over about four years

12 WEEKS
Application inventory, target cloud estate, landing zone design and a cutover plan set against the separation dates.

12 MONTHS
Migrate and modernize ERP-adjacent apps, HCP portals, ordering and data off J&J shared services.

3 YEARS
Managed cloud and applications with AI service agents, priced on total cost of ownership.

TRIGGER

Separation announced 14 October 2025

J&J plans to separate its orthopaedics business, about $9bn of revenue, within 18 to 24 months. Completion falls between April and October 2027.

WHY WIPRO

A new company carries its own run costs from day one. Offshore managed run is where Wipro is cheaper than the consulting-led rivals.

OPEN POINT

Wipro's current J&J relationship is unconfirmed, and the pursuit depends on it.

Rates of $170 an hour onshore and $35 offshore, team sizes and onshore mix are my assumptions. Source: J&J press release, 14 October 2025.

PLAN AND TARGETS

First 180 Days

DAYS 1 TO 30 · MAP THE MATRIX

Meet the client partners and global account executives in my portfolio and agree three to five joint accounts with each. Learn the offers, rate cards and deal desk rules, meet the AWS, Azure and Google Cloud partner teams, and clean the inherited pipeline.

DAYS 31 TO 90 · OPEN CONVERSATIONS

Publish three points of view tied to dated triggers, such as separations, data centre exits and end of support. Hold twenty first meetings with CIOs and CDOs, half through client partners and half through my own network.

DAYS 91 TO 180 · SHAPE LARGE PURSUITS

Turn two paid diagnostics into modernization proposals, shape the first $20m pursuit with the deal desk, and reach three times pipeline coverage.

TARGETS I WOULD ASK YOU TO HOLD ME TO

MEASURE	DAY 90	DAY 180	DAY 365
Qualified pipeline (TCV)	$30m	$55m	$70m
Bookings (TCV)	$2m	$7m	$18m
First buyer meetings	20	40	70
Client partners co-selling	6	10	15
Pursuits of $20m or more	0	2	3
Forecast variance	Under 10%	Under 5%	Under 5%

These assume a $15m to $20m book and are my estimates. I would reset them with your numbers in the first month.

FOR VIKAS

Questions

1. Which industries and accounts would this role cover, and is there a book I would inherit?
2. How are bookings credited between ICD and the client partner on a shared deal?
3. Which ICD offers are winning in the Americas today, and which are hardest to sell?
4. Who would I pair with in pre-sales and the hyperscaler alliances on the first pursuits?
5. What would a strong first year look like to you in bookings and pipeline?
6. What are the next steps in the process, and what is the timing?

Within a week of this meeting I can send **a draft account plan for five named accounts**, each with a dated trigger, a buyer and a sized first offer.
